

CORE PATH 38-18 R

Most frequently specified for garden paths and patio areas, designed for angular aggregates up to 14mm. This is also an eco-friendly grids as it is made from 100% recycled material.

Both the large sheet (1150x800mm) and the 6 handy pack sheets (575x400mm) come with a 50gsm non-woven weed membrane heat welded to the underside of the grid. This not only prevents weed growth from beneath the surface, but also prevents the gravel from migrating under the cell wall and into the sub base over time.

The sheets are designed to be flexible, allowing them to bend slightly and follow the contour of the ground. This makes the installation quick and easy.

Each sheet also has an interlocking mechanism on all four sides which allows all adjacent panels to be connected in every direction. This creates a continuous matrix across the entire surface meaning there is no need to pin or secure individual sheets to the ground.

CORE Path can be installed as a new porous surface or over existing hard surfaces such as tarmac, concrete or compacted gravel with minimal preparation.

Please see our CORE Path installation sheet for further information and guidance on build up and subbase requirements.

For any additional information or specification queries please give our technical team a call on freephone 0800 118 2278.

TECHNICAL SPECIFICATION

Material	Recycled Polypropylene
Handy Pack	6 x (575 x 400mm) 1.38m ²
Large Sheet	(1150 x 800mm) 0.92m ²
Cell Wall Thickness	1.0mm
Aggregate Coverage	33-35m ² per tonne
Depth of Cells	18mm (width 38mm)
Membrane	Attached 50gsm non-woven
Clipping Mechanism	Socket & Pin (all 4 sides)
Aggregate Size	Up to 14mm angular

APPLICATIONS

- Garden Paths & Patios
- Flowerbeds & Borders
- Summer House/Shed Base
- Disabled Friendly Access Route

BENEFITS

 DDA COMPLIANT	 ECO-FRIENDLY	 LOW COST
 EASY TO CUT	 NO WEEDS	 EASY INSTALL
 STABILISES GRAVEL	 STRONG	 SUDS COMPLIANT
