

Rolawn Blended Loam®

Rolawn Blended Loam® is a high quality, fertile, environmentally friendly, organic rich multi-purpose topsoil. It is a blend of Rolawn Screened Loam and a peat free soil conditioner. It is ideal for using in planting and landscaping where a quality outcome is essential.

Delivery options & coverage

Size: Small bag 1m³ bulk bag (1000 litres) 10-29 tonne tipper load 10-29 tonne 'walking floor' load

Coverage: 1m³ covers 10m² at a depth of 100mm

Rolawn Beds & Borders Topsoil

Rolawn Beds & Borders Topsoil is a high quality, fertile, environmentally friendly, organic rich, light and friable topsoil that contains a controlled release fertiliser and a water retentive polymer.

The controlled release fertiliser provides balanced fertility to promote healthy establishment of shrubs and plants. The water retentive polymer forms a water attractive film on the surface of the organic fibres in the soil. It holds water in and around the fibres until required by plants, when it is gradually released resulting in reduced water consumption, improved growth rate and enhanced root development.

Delivery options & coverage

Size: 1m³ bulk bag (1000 litres)

Coverage: 1m³ covers 10m² at a depth of 100mm

EXCEPTIONAL VALUE FOR MONEY UP TO 50% MORE PRODUCT THAN A TONNE OF ORDINARY TOPSOIL

A bulk bag of Rolawn Blended Loam®, Rolawn Vegetable & Fruit Topsoil and Rolawn Beds & Borders topsoil contains approximately 1m³ when packed.

1 tonne of ordinary topsoil only contains approximately 0.67m³

Rolawn Vegetable & Fruit Topsoil

Rolawn Vegetable & Fruit Topsoil is a fertile, organic rich, light and friable topsoil. It is a consistent blend of topsoil derived from prime arable land and a consistent organic matter, which ensures consistent results. It does not contain manures which can be variable and in some instances, potentially harmful.

Delivery options & coverage

Size: 1m³ bulk bag (1000 litres)

Coverage: 1m³ covers 10m² at a depth of 100mm

Rolawn Turf & Lawn Seeding Topsoil

Rolawn Turf & Lawn Seeding Topsoil is a free flowing friable topsoil, hence is easy to spread, even when moist. It is blended with Rolawn GroRight® Lawn Establishment Fertiliser to help ensure a lawn gets off to the best possible start.

Delivery options & coverage

Size: 0.73m³ bulk bag (730 litres)

Coverage: 0.73m³ covers 7.3m² at a depth of 100mm

Rolawn Screened Loam

Rolawn Screened Loam is a fine sandy topsoil, recovered from prime arable land.

Delivery options & coverage

Size: 0.73m³ bulk bag (730 litres)

10-29 tonne tipper load

Coverage: 0.73m³ covers 7.3m² at a depth of 100mm

Why quality is important

Ensuring you have high quality topsoil is essential as it will provide early establishment and development of turf, seed, trees, shrubs and plants. It is the foundation of a healthy landscaping scheme, therefore, it is essential to know the composition and source.

Rolawn is recognised as the leading supplier of quality topsoil (loams). Rolawn topsoils are safe, fertile, certified, of consistent high quality and available all year nationwide.

The Rolawn commitment

- You know where your topsoil is derived from
- Your complete order will be supplied from the same source
- You can request a test analysis that is independent, complete, authentic and includes data regarding PTEs (Potentially Toxic Elements). The laboratories conducting the analysis are accredited to:
 - Good Laboratory Practice (GLP)
 - United Kingdom Accreditation Service (UKAS)
 - Monitoring Certification Scheme (MCERT)
- Product is available all year, irrespective of weather conditions
- You can inspect the stockpile if required

Choosing the right topsoil

There are different grades of topsoil. Some are specialist and others are suited to a variety of applications. It is important to choose the right topsoil for your project.

Specification	Rolawn Blended Loam® Topsoil	Rolawn Screened Loam Topsoil	Rolawn Beds & Borders Topsoil	Rolawn Vegetable & Fruit Topsoil	Rolawn Turf & Lawn Seeding Topsoil
Typically classed as 'Sandy Loam'	🌱	🌱	🌱	🌱	
Typically classed as 'Loamy Sand'					🌱
Screened 20mm	🌱	🌱	🌱	🌱	🌱
Screened 10mm		🌱(loose only)

Calculating your requirements

The following information enables you to calculate your requirements.

Blended Loam™	1 bulk bag	= 1m³
	1 tonne	= 1.1m³
Beds & Borders Topsoil	1 bulk bag	= 1m³
	1 tonne	= 1.1m³
Screened Loam	1 bulk bag	= 0.73m³
	1 tonne	= 0.67m³
Vegetable & Fruit Topsoil	1 bulk bag	= 1m³
	1 tonne	= 1.1m³
Turf & Lawn Seeding Topsoil	1 bulk bag	= 0.73m³
	1 tonne	= 0.67m³

How to Calculate your requirements:

First, calculate the cubic metres required.
Simply multiply length x width x depth.

Example: A site has an area of 10m x 15m and needs a coverage of 150mm, 10 x 15 x 0.15 = 22.5m³

Then, once you know the cubic metres, simply divide it by:

1 for bulk bags of Blended Loam™
22.5 divided by 1 = 23 bulk bags

1.1 for loose Blended Loam™
22.5 divided by 1.1 = 21 tonnes

1 for bulk bags of Beds & Borders Topsoil
22.5 divided by 1 = 23 bulk bags

0.73 for bulk bags of Screened Loam
22.5 divided by 0.73 = 31 bulk bags

0.67 for loose Screened Loam
22.5 divided by 0.67 = 34 tonnes

1 for bulk bags of Vegetable & Fruit Topsoil
22.5 divided by 1 = 23 bulk bags

0.73 for bulk bags of Turf & Lawn Seeding Topsoil
22.5 divided by 0.73 = 31 bulk bags

Note: Due to the nature of these products, the density can vary. These figures are given as a guide only. Conversions are approximate.

There is a topsoil calculator on www.topsoil.co.uk
